

# Azure monitoring

Habilitar o monitor do Azure permite instalar na VM um agente que vai monitorar as atividades da instância.

Criando um alerta para quando a VM for deletada, um email ser disparado para informar a deleção.

Criando um action group para configurar a ação a ser tomada quando um alerta é acionado

## Create action group ...

An action group invokes a defined set of notifications and actions when an alert is triggered. [Learn more](#)

### Project details

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Subscription ⓘ Azure subscription 1 ✓
